

Upgrade to EBMS 9.0

Speed. Stability. Scale.

EBMS 9.0 moves your data to Postgres, a modern relational database that makes daily work faster today and lays the groundwork for major improvements tomorrow.

It's FREE to upgrade.

Why upgrade now?

10–100x reporting speeds

Many Crystal Reports run dramatically faster, depending on the report and dataset.

Snappier experience

Screens, dialogs, and lists feel quicker and more responsive.

Direct live data access

Modern lists read from the live database instead of waiting on mirrored updates.

Routine reindexing eliminated

Routine weekly reindexing and index-corruption headaches are largely eliminated.

Scales with your business

Performance holds up with large datasets and dozens of concurrent users.

Over 50 customers have upgraded.

“

Reports that used to take forever now run in seconds. We saw 10–100x reporting speeds on key reports.”

“

We no longer have to schedule weekly reindexing. It's one less thing for IT to worry about.”

“

Lists are live and accurate. Our team finally sees current data without the delays.”
